- Standard, number, and do-re-mi chord format options
- Built-in metronome and on-screen annotations
- Host-device controlled page turning and Bluetooth page turning (clickers & foot pedals)

Requires either a Pro or Pro Plus plan

Is Presenter compliant with license display requirements?
Users can enter copyright details when creating a song (details will auto-fill for SongSelect imports). They can also choose to display those details via a title slide or in the footers. These details are displayed in the other apps as well.

Do I have to pay to use Presenter on multiple computers?
Presenter is free to download on as many computers as needed. However, to have Presenter open and running on more than one computer at the same time requires the Pro Plus plan.

Can I livestream with Presenter?
Presenter can be paired with programs like OBS (free) for a great livestream setup.

Do the apps work offine?
Yes. Presenter will load the last version of the cue list it had access
to when it was online. You can also create new cue lists while in offline mode.

Can I access Music Stand from a computer?
Yes. Music Stand is available as a mobile app on Android and iOS phones and tablets, but it can also be accessed from the Services pages on the Planning website or at musicstand.worshiptools.com

Do Music Stand and Planning read ChordPro®?
Yes, both apps have a built-in ChordPro® editor so you can customize your song arrangements right in the app.

Can I view SongSelect lead and vocal sheets with Music Stand?
Yes, when a song is imported from SongSelect into Music Stand, all the available SS files will be imported and available for use right within Music Stand. (Also dependent on their SS plan.)

Will importing new songs affect my 200 credit limit on SongSelect?
Presenter and Planning allow you to preview the lyrics and a credit will only be used when you click "Import." Music Stand will immediately use a credit upon opening the song and will continue to pull the song from SS when the SS source is selected. You can work around it by creating a ChordPro copy. (Please view our Source Selector doc/video for more context.)

Is Planning only for the worship team?
Planning can be used to schedule volunteers for the whole church. Add your volunteers to your team and assign them the appropriate roles (Worship Leader, Pastor, Guitarist, Greeter, Youth Leader, etc.) and schedule them to serve on your various services.

Do the apps track song usage for reporting?
Song Usage Reports can be viewed in Presenter and Planning, and can also be exported as an Excel sheet.

Where can users go to learn more?
Users can check out our website: worshiptools.com. The *Support > Docs & Tutorials* is a great place to get started. They can also sign up for Live Trainings, watch free workshops on our WorshipTools YouTube channel, join our Facebook User Group, or contact us at **support@worshiptools.com**.

All WorshipTools plans include:

Presenter   Planning   Music Stand

FREE	PRO	PRO PLUS
$ **0** / life	$ **19** /month or $195/year (save 15%)	$ **29** /month or $295/year (save 15%)
